### SOLID RUSTPROOF ALUMINUM CONSTRUCTION

**Glaro Modular Racks** are manufactured in 24", 30", and 36" starter sections (with two end brackets included) and 24", 30", and 36" add-on sections (consisting of a center support bracket plus add-on tubing, etc.) which connect with the starter section and other add-on sections to make a continuous rack of almost any overall length in half foot increments.. Please note that 42" racks cannot be made with standard components. All racks extend approximately 13" from the wall and the racks are designed to mount onto any type of wall surface.

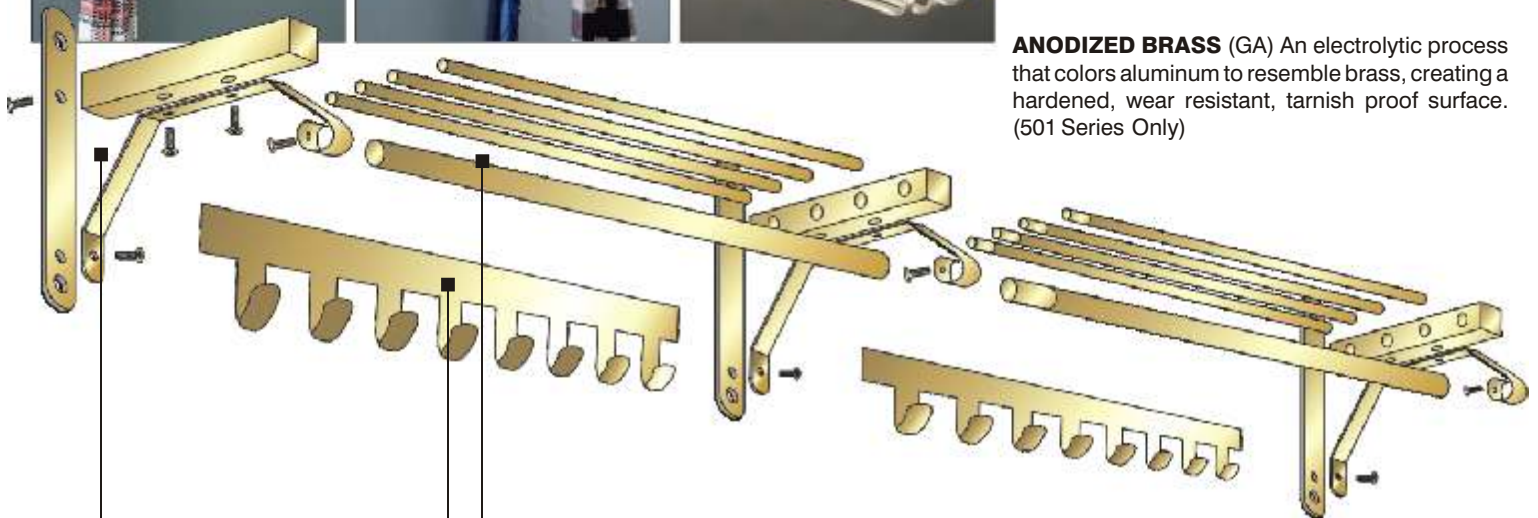

When ordering, specify the overall desired length (in half foot increments) and the factory will supply the proper combination of components.

Hangers shown are not included.

### FINISHES

**SATIN ALUMINUM (SA)** Aluminum, surface ground, fine satin polished.

**ANODIZED BRASS (GA)** An electrolytic process that colors aluminum to resemble brass, creating a hardened, wear resistant, tarnish proof surface. (501 Series Only)

**Heavy Gauge Polished, Extruded Aluminum Tubing for Strength and Stability**

**Hooks for Extra Hanging Capacity (8000B, 8000C & 9000C Only)**

**Heavy Duty Wall Mounting Brackets**
